Contract NObsr -574 ~~WEITER DISSEMINATION IS AUTHORIZED ONLY TO
In Tex No. NE-02073 MILITARY AGENCIES.~~ 22 September 1954

WARNING. This document contains information affecting the national defense of the United States within the meaning of Espionage Laws. Title 18, U.S.C., Sections 793 and 794. The transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law. Reproduction of this document in any form by other than activities of the Department of Defense and the Atomic Energy Commission is not authorized unless specifically approved by the Secretary of the Navy or the Chief of Naval Operations.

Contractor holds and is licensed under many thousands of patents and patent applications, and it is impractical for this reason to identify those which may be pertinent to this project. It is quite possible that many of them are.

Contract NCbs: -57416
Index No. NE-020731

Date 22 September 1954
Period Covered 8/16/54 to 9/15/54

- Page 1 -

OBJECTIVE:

To design, develop and construct five (5) Type AN/UAT-1 Infrared Transmitting Sets, in accordance with Bureau of Ships Contract Specification SHIPS-T-656, dated 15 March 1952

GENERAL DATA:

A large part of the required electrical components was received from vendors during the period of this report. However, certain transformers and capacitors will not be delivered until sometime later in September or October. This may delay completion of the modulators until later in November, whereas completion was originally scheduled for November 1st.

Because of delays in fabricating the transit case shells it has not yet been possible to send them to Craig Machine, Inc. for final fabrication. It is expected that the cases will be ready to be sent to Craig by September 24, and the finished cases should then be ready by December 1. Fabrication of other mechanical parts is proceeding according to schedule, and chassis, etc. will be ready for wiring when required.

The maintenance parts list is being prepared and should be ready for submission by October 6. A quantity of clear glass globes for use on the transmitter assemblies will be submitted to Portsmouth Naval Shipyard for application of filter coating by October 1.

Because of the delays mentioned the estimated date for start of inspection testing is revised to January 15 instead of December 15
